

# TEYE

## MINERALS™

### Health Bites

**Minerals** is the magic word of the moment in makeup. Calgary's Teye International, debuting its whopping new makeup collection at Holt Renfrew, has minerals galore. The company's Web site ([www.teye.ca/](http://www.teye.ca/)) extols the virtues of minerals: they allow oxygen and nitrogen to pass through makeup to the skin; they

shield the body against ultraviolet rays; they're anti-inflammatory agents; and they're antibacterial. Plus, that light-reflecting quality makes us look radiant. The Teye line includes the Safari and Zebra bronzers—prismatic mineral powders that can be brushed on eyes, face, and body to create shimmering highlights or an all-over glow. (\$20 to \$79 at Holt Renfrew)
